Bug#1

Description:

When a user enters a large integer in the input field of the timer and when the default theme setting is Classic the timer does not work however, It shows the error message with other themes such as digital or ugly.

Steps to reproduce:
1. Navigate to the website
2. Enter time 4568476846664564676764597
3. Click on start button
4. Default theme is selected – Classic
5. User is redirected to the timer page
   https://e.ggtimer.com/4568476846664564676764597

Expected Result
The timer should work correctly for all integer values and with all the themes.

Actual Result
The timer shows up a blank page
